➔ **PROFESSIONAL SUMMARY**

Machine Learning Engineer skilled in building end-to-end predictive models , Focused on solving real-world business problems using scalable, data-driven solutions.

➔ **Projects**

1 Student Habits vs Academic Performance Prediction

Built a Linear Regression model achieving $R^2 = 0.90$ to predict exam scores based on lifestyle factors.

2 Sales Prediction using Machine Learning

Developed multiple regression models (RF, XGBoost, Gradient Boosting) with best $R^2 = 0.9989$ for marketing optimization.

3 Sonar Rock vs Mine Classification System

Implemented Random Forest classifier with 85.71% accuracy focusing on recall for safety-critical prediction.

4 Cafe Management System (Python + MySQL & Django Version)

Designed a full-stack restaurant order and billing system with database integration and modern UI.

5 Customer Segmentation using K-Means Clustering

Performed unsupervised learning on real datasets to segment customers based on behavioral patterns.

6 Customer Churn Prediction + RFM Segmentation

Built a machine learning model to predict customer churn and performed RFM-based segmentation to identify high-value and at-risk customers.

7 Wine Quality Clustering (Unsupervised Learning)

Applied K-Means clustering and PCA visualization to segment wine samples based on chemical properties.

8 A/B Testing using Hypothesis Testing

Performed statistical hypothesis testing to compare treatment vs control groups and analyze conversion rate improvements.

9 Credit Card Customer Segmentation

Used K-Means clustering and PCA to segment customers based on spending behavior for targeted marketing strategies.

10 Video Upload & AI-Based Duplicate Detection System (Django)

Created a Django web app integrating Bloom Filter and AI-based video similarity detection with MongoDB.

➔ **TECHNICAL SKILLS**

Languages: Python, SQL, JavaScript

ML Libraries: Scikit-learn, Classification , Regression, Unsupervised, Boosting Techniques.

Data Handling: Pandas, NumPy.

Visualization: Matplotlib, Seaborn , Power BI.

Web & Deployment: Django, FastAPI, Flask, REST API, React.

Databases: MySQL, SQL.

➔ **Certification's**

- Industrial Training & Internship in Machine Learning – Academy of Skill Development (Nov–Dec 2024)
- Machine Learning using Python – Simplilearn (Dec 2025)
- Data Analysis with Python – AFFY Informatics Pvt. Ltd. (Aug 2024)
- Soft Skills Development – SGBS Unnati Foundation (Sep 2024)
- Kaggle Community Member & Python Coder – Kaggle (1+ Year Active)

➔ **ACHIEVEMENTS**

Built 10+ end-to-end ML projects with real-world datasets Achieved high-performance models (R^2 up to 0.99)
Implemented ensemble & boosting techniques for performance optimization Designed ML-integrated web applications

➔ **EDUCATION**

Bachelor's Degree – [Information Technology] [AITR-mangliya(indore)] | [2nd]

Diploma holder:- [information Technology] [Dr. B.R.A Polytechnic college,Gwalior] [p-out 2025]
